STYLE GUIDES ONLINE

WHAT IS A STYLE GUIDE?
Style guides are not meant to teach you how to write, they were created to define the rules and guidelines of proper writing in order to present the written material in a clear and consistent format. The style guides teach us how to use elements such as punctuation, abbreviations, table construction, heading selection, reference citations, statistic presentations, and other elements.

The following are some of the style guides that are available in an online format:

APA Style
